EDUCATION

Vellore Institute of Technology- 2027
Master of Computer Applications

Techno Main Salt Lake - 2023
Bachelor of Computer Applications

Julien Day School (ISC) - 2020
Indian School Certificate

Julien Day School (ICSE) - 2018
Indian Certificate of Secondary Education

TECHNICAL SKILLS

Programming Languages: HTML5, CSS3, JavaScript, TypeScript, SQL.

Technologies: React, React Native, Next.js, Redux Toolkit, Axios, Razorpay, Stripe, SMTP.

Tools: Microsoft Visual Studio Code, Git, Postman, Android Studio, Xcode, Firebase Cloud Messaging, Firebase Authentication, Bitbucket

Others: Figma, Premiere Pro.

WORK EXPERIENCE

❖ **Team Lead & Mobile Application Developer | Altis Infonet Private Limited** (November 2024 – Present)

Projects

1. Agent CRM – SaaS Platform (SaaS, Multi-Tenant) (January 2026 – Present)

Team Lead & Mobile Application Developer (React Native)

Overview

- Led end-to-end development of **cross-platform React Native (Android & iOS) applications** using **TypeScript**.
- Architected the app using **MVVM architecture** (Model–View–ViewModel) for scalable and maintainable code structure.
- Implemented **agent onboarding, KYC capture, customer management, and policy assignment** workflows.
- Developed **customer management interfaces** enabling agents to add, view, search, and manage customer profiles with Aadhaar, PAN, bank details, and notes.
- Integrated **push notifications** using Firebase Cloud Messaging for renewals, meetings, birthdays, follow-ups, scheduler, TO-DO, and reminder modules.
- Integrated **secure document upload and management** with backend APIs and AWS S3.
- Implemented **dynamic theming**, allowing **font styles and accent colour customization** for improved user experience.
- Implemented **role-based access control** and subscription-based feature restrictions.
- Used **Redux Toolkit** and **Context API** for state management and **Axios** for REST API integration.
- Implemented **Stack and Bottom Tab navigation** using React Navigation.
- Managed **Android & iOS deployments** via Google Play Console, App Store Connect, and TestFlight.

Technologies Used: React Native, TypeScript, MVVM Architecture, Redux Toolkit, React Navigation, Axios, REST APIs, Firebase Cloud Messaging, Android Studio, Xcode, Git, Postman, Google Play Console, App Store Connect, TestFlight

2. Inventory Management Application (August 2025 – December 2025)

Team Lead & Mobile Application Developer (React Native)

Overview

- Developed a comprehensive Inventory Management App in React Native enabling users to manage inventory, production, and HR tasks such as attendance and leave management.
- Designed an intuitive dashboard with charts and graphs to provide actionable insights at a glance.
- Implemented geolocation functionality to accurately fetch user coordinates during attendance tracking.
- Created a smooth and user-friendly UI/UX, including dynamic forms and multi-theming options (dark/light mode, customizable fonts and accent colors).
- Collaborated closely with the backend team, providing guidance on API design and application flow for seamless integration.
- Utilized Redux Toolkit to manage authentication and Context API for efficient theme management across the app.
- Integrated REST APIs using Axios for reliable data communication and state management.
- Managed the full app lifecycle using Android Studio, Xcode, Google Play Console, App Store Connect, and Apple TestFlight.
- Leveraged Git for version control and Postman for API testing and validation.
- Optimized app performance and user engagement through responsive design and intuitive navigation.

Technologies Used: React Native, Redux Toolkit, Axios, REST APIs, Git, Postman, Android Studio, Xcode, Google Play Console, App Store Connect

Play Store: <https://play.google.com/store/apps/details?id=com.zventory>

App Store: <https://apps.apple.com/in/app/zventory/id6757734452>

3. Multi-Vendor E-Commerce with Reels and Live Streaming Application (April 2025 – July 2025)

Team Lead & Mobile Application Developer (React Native)

Overview

- Developed a **multi-vendor e-commerce platform** in which the vendor can add their product, create reels, and do live streaming.
- Designed a modern, accessible, and **intuitive UI**, ensuring a superior user experience.
- Integrated **ZEGO** to provide a smooth **live streaming** experience for the vendor and the buyer.
- Created an **Instagram reel-like** experience with products in reels for the buyers.
- Integrated Facebook and YouTube, allowing vendors to add reels and live streaming from these platforms to the app.
- Integrated **Razorpay** for secure, smooth checkout transactions.
- Leveraged **Redux Toolkit** for efficient state management and optimized app performance.
- Added **Light & Dark Theme** options for better user experience.
- Integrated **Firebase Cloud Messaging** for real-time push notifications.
- Used **Axios** to handle asynchronous API calls and ensure smooth front-end/back-end communication.
- Implemented **AES Encryption** to secure data during API calls.
- Applied **Agile Methodologies** for continuous development, testing, and iteration.

Technologies Used: React Native, Redux Toolkit, Axios, REST APIs, Razorpay, Zego Cloud, Firebase Cloud Messaging, Git, Postman, Android Studio, Xcode, Google Play Console, App Store Connect, and Apple TestFlight.

App Store - <https://apps.apple.com/in/app/yumdut/id6753862501>

4. E-Commerce and Service Application (November 2024 – March 2025)

Mobile Application Developer (React Native)

Overview

- Developed a scalable cross-platform app (**Android/iOS**) using React Native, allowing users to book pet services and buy products seamlessly.
- Designed a modern, accessible, and intuitive UI, ensuring superior user experience.
- Integrated **Razorpay** for secure, smooth checkout transactions.
- Added **Google and Apple Maps** for accurate address selection in service bookings.
- Leveraged **Redux Toolkit** for efficient state management and optimized app performance.
- Integrated **Firebase Cloud Messaging** for real-time push notifications.
- Used **Axios** to handle asynchronous API calls and ensure smooth front-end/back-end communication.
- Implemented **AES Encryption** to secure data during API calls
- Managed app updates via **Google Play Console** and **App Store Connect** for smooth release cycles.

- Applied **Agile Methodologies** for continuous development, testing, and iteration.

Technologies Used: React Native, Redux Toolkit Axios, REST APIs, Google Maps, Apple Maps, Razorpay, Firebase Cloud Messaging, Git, Postman, Android Studio, Xcode, Google Play Console, App Store Connect, and Apple TestFlight.

App Store - <https://apps.apple.com/in/app/mignonne-pink-paws/id6742444159>

❖ Executive System and IT | Jain Group (October 2023 – October 2024)

Projects

1. Task Management Application (January 2024 – September 2024)

Front-End Developer

Overview

- Designed a user-friendly UI for task creation, updating, and deletion, simplifying processes to notepad-like simplicity.
- Developed drag-and-drop functionality for task assignment and updates.
- Implemented role-based task views for **managers and executives**, enhancing user experience.
- Developed an **Advanced Filtering System** to filter tasks and provide a better viewing experience.
- Built an **advanced dashboard system** to generate reports and analytics.
- Constructed a centralized State Management System using **Redux Toolkit**.
- Integrated **Axios** to manage **REST API** calls effectively.
- Applied **Agile Methodologies** for continuous development, testing, and iteration.
- Increased employee productivity by 30% by streamlining task management processes.

Technologies Used: React Native, Redux Toolkit, Axios, Node, Bitbucket, Microsoft Visual Studio Code 2024.

2. Chatbot Development (October 2023 – December 2023)

Back-End Developer

Overview

- Developed a chatbot that **recognizes customer journey stages** and **responds accordingly**, enhancing user engagement.
- Designed backend database tables to **store chatbot conversation history**, enhancing context-aware responses.
- Integrated the chatbot with WhatsApp using templates and **WhatsApp Business API**.

Technologies Used: Ruby on Rails, PostgreSQL, OpenAI API, WhatsApp Business API, Bitbucket, Microsoft Visual Studio Code 2023.
